Press Release

Eiffage wins the contract to design-and-build the Singrobo-Ahouaty hydropower plant in Côte d'Ivoire, in an order worth nearly €110 million

Ivoire Hydro Energy - which recently signed the first contract amendment to the concession agreement with the government of Côte d'Ivoire relating to the Singrobo-Ahouaty hydropower plant - has awarded Eiffage the turnkey design-and-build contract for the project.

This contract, representing a value of nearly €110 million, covers the design and build of the civil engineering works as well as the manufacturing, installation and commissioning of all hydromechanical, electromechanical and electrical equipment for this 44 MW plant.

The project includes the construction of a concrete rockfill dam, a spillway, a turbine plant, a discharge channel, the switchyard, the power line connecting the plant to the grid, temporary facilities and access roads. Eiffage Génie Civil and Eiffage Énergie Systèmes are to provide expert support. Work will start during the first quarter of 2019 and will last for three years.

This contract was awarded following an international request for proposals issued by Ivoire Hydro Energy in 2015, which was won by Eiffage in 2016.

Following on from the Félix Houphouët-Boigny bridge renovation project, for which work is currently in progress, the Singrobo-Ahouaty hydropower plant will be another major infrastructure built by Eiffage in Côte d'Ivoire.

About Eiffage

Eiffage is one of Europe's leading construction and concessions companies. The Group's activities are organised on the basis of the following business lines: construction, real estate and urban development, civil engineering, metal, roads, energy and concessions. Thanks to the experience of more than 65,000 employees, Eiffage generated revenues of €15 billion in 2017, of which nearly 21% outside France.

About Eiffage Génie Civil

Eiffage Génie Civil is actively involved from design through to construction in a large number of structural projects in both France and abroad, notably in Africa. On a day-to-day basis its teams work on civil engineering structures, civil engineering for infrastructure projects, underground works, offshore and river construction, earthmoving, demolition and decontamination, foundations and structural repair.

About Eiffage Énergie Systèmes

Eiffage Énergie Systèmes designs, builds and operates grid, energy systems, while respecting people and protecting the environment. As a true energy services contractor with expertise in all aspects of the electrical, industrial and climate engineering, Eiffage Énergie Systèmes offers comprehensive, multi-technical services – from design to operation and maintenance – that can be customised and graduated according to the scale and type of projects and provides innovative solutions for local authorities, the infrastructures and networks, the service and industrial sectors, in France and worldwide. Backed by the experience of 26,000 employees, Eiffage Énergie Systèmes generated €3.8 billion in revenues in 2017.
