

Press Release

Bolloré Transport & Logistics chooses Eiffage to expand its container terminal at Freetown's port in Sierra Leone

Eiffage, represented by its Eiffage Génie Civil subsidiary, is leading a consortium that has been awarded a design-build contract awarded by Freetown Terminal Ltd, a subsidiary of Bolloré Transport & Logistics, for the expansion of its container terminal at Freetown's port, Sierra Leone. Eiffage will be backed by RMT, a subsidiary of Clemessy (Eiffage Group) with expertise in electrical engineering and process automation, and Bellsea, a subsidiary of Belgium's Deme group, specialised in marine and dredging works.

The project – worth about €47 millions – involves the construction of a new 270 meter quay to accommodate vessels with a draft of 13 meters. The quay wall consists of a combi-wall system with piles and sheet-piles and a reinforced concrete capping, the main other characteristics being the following ones: 260 000 m³ of dredging works, 650 000 m³ of land reclamation, 50 000 m² of road structure, 12 000 m³ of reinforced concrete and a 6 MVA power plant.

Works started on August 15 and are expected to be completed within 24 months.

This contract – the second entrusted to Eiffage by Bolloré Transport & Logistics, following the works on quayside storage areas at Lomé's port, Togo, delivered in June 2016 – comes as a confirmation of Eiffage's international deployment policy in favour of the world's major economic players.

About Eiffage

Eiffage is a one of Europe's leading construction and concessions companies. The Group's activities are organised on the basis of the following business lines: construction, real estate, civil engineering, metal, roads, energy and concessions. Thanks to the experience of more than 64,000 employees, Eiffage generated revenues of €13.9 billion in 2015, including 19% outside France.

About Eiffage Génie Civil

As part of the Eiffage Infrastructures division (with 23,000 employees and revenues of €4.4 billion in 2015), Eiffage Génie Civil specialises in engineering structures, facility civil engineering, underground works, maritime and river works, earthwork, demolition and decontamination, foundations and structural repairs.
