

Press release**Eiffage wins the contract for the construction of the metal framework and the facade of Le Monde's new headquarters in Paris for more than €43 million**

Through its Eiffage Métal (consortium leader), Eiffage Génie Civil and Goyer subsidiaries, Eiffage has been selected by the Le Monde press group to build the metal framework and the facade of its new headquarters of nearly 23,000 sq m. in Paris' 13th district, in the Paris Rive-Gauche commercial development zone, for a total amount of €43 million overall.

This eight-storey bridge building will stand on two piles and be supported by a metal structure built partly in Lauterbourg (Alsace), in one of Eiffage Métal's plants. Its facade will consist of a two-layered envelope. Goyer will build the first, watertight section, while Eiffage Métal will make the second, which is mainly decorative.

The project, developed by Redman on behalf of the Le Monde group, was designed by the architectural firms Snohetta (Norway) and Sra-Architectes (France) following an international tender.

The building will stand on a slab reinforced by Eiffage Génie Civil, over the railway tracks near the Gare d'Austerlitz.

When work is complete in 2019, the building will house the publications of the Le Monde (*Le Monde*, *Télérama*, *Courrier International*, *La Vie*) and the Nouvel Observateur (*L'Obs*, *Rue 89*) groups.

About Eiffage

Eiffage is one of Europe's leading construction and concessions companies. The Group's activities are organised on the basis of the following business lines: construction, real estate, regional development, civil engineering, metal, roads, energy and concessions. Thanks to the experience of more than 63,000 employees, Eiffage generated revenues of €14 billion in 2016, including nearly 20% outside France.

About Eiffage Métal

Eiffage Metal is the Group's brand dedicated to metallic construction. Specialising in complex projects, it is also a leading industrial player, present throughout Europe and internationally.

About Eiffage Génie Civil

Eiffage Génie Civil is actively involved – from design through to construction – in a large number of structural projects in both France and abroad, notably in Africa. On a day-to-day basis its teams work on civil engineering structures, civil engineering for infrastructure projects, underground works, offshore and river construction, earthmoving, demolition and decontamination, foundations and structural repairs.

About Goyer

Goyer has been making facades since 1931 and has unique expertise in the design and installation of aluminium and glass facades. Goyer is a market leader in France with a constantly growing number of international operations.
