## Press release

### **Eiffage, in a consortium, wins the contract for the final phase of reconstruction works at the Baumettes prison facility in Marseille for a value of just over €90 million**

Eiffage, through its subsidiaries Eiffage Construction (consortium leader) and Eiffage Énergie Systèmes, recently won, in a consortium, the contract for the third and final phase of the reconstruction project at the Baumettes prison facility in Marseille for a value of just over €90 million.

Eiffage's share of the contract amounts to €87 million. The consortium includes the architects Groupe 6 and WTF/A, environmental consultants Inddigo, and design engineers WSP and CS Ingénierie.

Initiated by the APIJ (*Agence publique pour l'immobilier de la Justice*) on behalf of the French Ministry of Justice, this contract includes the demolition of the men's prison, plus the design, construction and fitting of a new 30,000 square-metre prison facility on the same site.

With a capacity of just over 700, this new prison facility will include five accommodation blocks and a disciplinary block, with a particular focus on comfort during summer, consolidated administration areas, a theatre, four sports pitches and multi-storey car park. The layout of the buildings has been designed to minimise its impact on the surrounding environment.

This project involves multiple areas of the Group's expertise. Eiffage Construction will be responsible for construction using BIM. Eiffage Énergie Systèmes is responsible for safety and security, high- and low-voltage electrical systems, and HVAC/plumbing. Eiffage Génie Civil will demolish the existing buildings, with most of the recovered material being reused on site to reduce the impact on local residents.

The 31-month works phase will begin following a one-year design and demolition phase, with delivery scheduled for the second half of 2024. This will conclude the prison reconstruction project that began in 2013 with preparatory works, also carried out by Eiffage, and complete the integration of the different components into a single establishment.

**About Eiffage**

Eiffage is one of Europe's leading construction and concessions companies. The Group's activities are organised around the following business lines: construction, real estate and urban development, civil engineering, metal, roads, energy and concessions. Thanks to the experience of more than 72,500 employees, Eiffage generated revenue of €18.1 billion in 2019, of which almost 26% was outside France.

**About Eiffage Construction**

Eiffage Construction, a subsidiary of the Eiffage Group, one of Europe's leading construction and concessions companies, incorporates the complementary business lines of urban planning, property development, construction, facility management and maintenance. The company is strongly established in France with 9 regional divisions, and also in Belgium, Luxembourg, Switzerland and Poland. Eiffage Construction generated revenue of €4.3 billion in 2019.

**About Eiffage Énergie Systèmes**

Eiffage Énergie Systèmes designs, builds, operates and maintains electrical, industrial, HVAC and energy systems and facilities while respecting people and protecting the environment. Eiffage Énergie Systèmes provides a customised offer for the industrial, infrastructure and network markets, local authorities and the tertiary sector. Through its dense network of branches in more than 30 countries, Eiffage Énergie Systèmes builds close relationships and meets its customers' challenges head on. Its cutting-edge expertise enables it to provide innovative, high added-value solutions. Eiffage Énergie Systèmes generated revenue of €4.5 billion in 2019.

**About Eiffage Génie Civil**

Eiffage Génie Civil is actively involved – from design through to construction – in a large number of structural projects in both France and abroad, notably in Africa. On a day-to-day basis its teams work on civil engineering structures, civil engineering for infrastructure projects, underground works, offshore and river construction, earthmoving, demolition and decontamination, foundations and structural repairs.
