Press Release

Eiffage wins two major offshore wind contracts off the German coast

Eiffage, through Smulders (a Belgian subsidiary of Eiffage Métal), has been awarded two contracts by Ørsted, the world leader in offshore wind energy, to manufacture the secondary steel elements for the single-pile foundations of the Gode Wind 3 and Borkum Riffgrund 3 offshore wind farms in Germany.

Smulders will supply the secondary structures for the foundations of the 23 wind turbines and the offshore substation for Gode Wind 3, as well as the foundations for the Borkum Riffgrund 3 offshore wind farm's 83 wind turbines. Smulders will supply, among other things, the boat landings, external ladders, suspended internal cages and anode cages protecting from corrosion.

The majority of the equipment will be manufactured in Smulders' Polish factory before being transported to the coast where it will be assembled and the electrical system installed. Production will start in May 2022 and will continue until the first quarter of 2023.

The Borkum Riffgrund 3 offshore wind farm, located in the German North Sea, will have a total capacity of 913 MW and is expected to be commissioned in 2025. Gode Wind 3, also located off the German coast, will have a total capacity of 253 MW and is expected to be commissioned in 2024. When completed, these wind farms will produce electricity equivalent to the consumption of around 1.2 million households in Germany each year.

These two new contracts demonstrate Ørsted's confidence in Smulders and their cooperation for the supply of innovative secondary steel elements for the development of TP-less foundation technology.

**About Eiffage**

Eiffage is one of Europe's leading construction and concessions companies. The Group's activities are organised around the following business lines: construction, real estate and urban development, civil engineering, metal, roads, energy and concessions. Thanks to the experience of its 73,500 employees, Eiffage generated revenue of €18.7 billion in 2021, of which 27% was outside France.

About Eiffage Métal

Eiffage Métal is the Eiffage group's brand dedicated to turnkey metallic construction. Its teams design and build construction shells and façades, and engineering structures. Eiffage Métal is an industry leader, particularly in the offshore wind sector, specialised in complex, multi-technical projects. With a strong European and international presence and nine production plants, Eiffage Métal employs more than 2,100 people.
